

E-Courier's competitive advantages

- I. E-Courier was specifically designed to prioritize data security and be a comprehensive secure replacement for non-secure email for professionals and their clients
- II. E-Courier does not have a backdoor
- III. We own and operate our own servers and do not depend on 3rd party Cloud based storage providers such as Amazon, Google, or Microsoft
- IV. For a higher level of protection e-Courier supports the ability for your clients to securely and easily exchange both encrypted emails and files
- V. E-Courier is a full two-way service meaning that your clients can initiate secure communication with you at any time and get virtually symmetrical functionality free of charge
- VI. For non-repudiation and to save you time, e-Courier provides proof of delivery of messages and files via e-Courier's comprehensive tracking dashboard and audit logs
- VII. We provide a robust secure file and message deposit box that allows your clients who are technically challenged to easily upload sensitive information to one or more recipients without having to use a password
- VIII. Proprietary smart searching of meta data in your inbox or tracking dashboard makes it much easier and faster to find information of interest
- IX. Provides the ability to recall information sent in error and set expiry periods to delete data
- X. E-Courier can be used anywhere on any type of device without having to install an app
